

Set Elevation Project

This final project is a scenario that very possibly could happen in real life. Imagine you are working for notable set designer Christine Peters. She was hired to create the set for the Broadway Palm's Broadway musical Cinderella. She has hand drafted some of the elevations for her design but needs them drafted in scale in the computer in order to distribute them to the construction team.

Please re-create the drawing in Vectorworks in $\frac{1}{2}'' = 1'0''$ scale and use an ARCH D (36x24) paper size.

You will need to create the largest title block (on the title block handout) it is recommended that you use a number of layers to manage the organization of this draft.

There are 5 elevations provided, one for each unit A through E

TPA 1340, you need to draw at least 3 of the 5 elevations. Extra credit will be provided for additional elevations drawn and or adding digital color/texture to your drawings.

TPA 2341 must draw all 5 elevations.

On your drafting, include the labels, notes, and dimensions that were on the documents provided.

Do please include the 6' tall figure

Please include the following information in the title block with this project.

Show title: Cinderella the Musical

Drawing title: Elevation Project

Producing organization: Broadway Palm

Director: (feel free to get creative)

Designer: Christine Peters

Technical Director: Brandon Lettow

Drafter: Your name

Date:

Scale: $1/2'' = 1''$

Due 5/2/2022
